RESPONSE TO RESTRICTION REQUIREMENT

Dear Sir:

This is a Response to the Restriction Requirement rendered in the above-identified patent application on June 24, 2003. The Restriction Requirement of June 10, 1999 restricted the pending claims 24-29 to the following groups:

- I. Claims 24-25, drawn to methods of mitigating retinoid irritation, classified in class 514, subclass 725.

II. Claim 26, drawn to methods of controlling the administration of hydrophilic or hydrophobic active agents, classified in class 424, subclass 59.

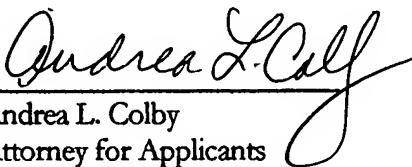

III. Claims 27-29, drawn to methods of enhancing the penetration of lipophilic compounds into the skin, classified in class 424, subclass 401.

Applicants respectfully transverse this restriction requirement and respectfully submit that the searching of the three Groups of claims should not entail a burden upon the Patent and Trademark Office. Applicants, however, provisionally elect the claims of Group III (claims 27-29) to prosecute in this patent application.

The Office Action of June 24, 2003 also required the election of a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The two species from which the election is to be made are: various lipophilic compounds and sugars. Although applicants respectfully traverse this requirement, applicants respectfully elect various lipophilic compounds.

Applicants respectfully request reconsideration of the restriction requirement set forth in the Office Action of June 24, 2003 in light of the foregoing discussion. An early search and allowance are earnestly solicited.

Respectfully submitted,

Andrea L. Colby
Attorney for Applicants
